

Date Issues

Date Issues	
Reason	Explanation/Solution
The report uses the start and end date columns to report the total amount applied for the date range.	Report the amount of a single pesticide applied on a single date at a single location; date ranges may only be used to report automated applications such as are made in <u>cooling tower systems</u> .
The report is a resubmission of a prior year's report	We cannot accept prior-year reports that have had the dates changed to the current report year or reports for a previous year.
