

# EPA Registration Number Issues

Issue	Explanation/Solution
Hyphens, which should separate the parts of the EPA number, are missing.	Report, for example, 3125-474, <u>not</u> 3125474 or 00312500474.
Numbers are omitted.	Report the <u>complete</u> EPA number, exactly as it appears on the product label.
<a href="#">EPA Establishment Number</a> is reported instead of the <a href="#">EPA Registration Number</a> .	<a href="#">EPA Establishment Numbers</a> do not identify pesticide products. Numbers on the product label which contain a two or three-letter state or country abbreviation are not <a href="#">EPA Registration Numbers</a> .
Leading zeroes are included.	Report 3125-474, <u>not</u> 003125-00474 or 00312500474.
Products that are not considered pesticides are reported.	Only report products that have an <a href="#">EPA Registration Number</a> . Glue boards, mouse traps, fertilizers, adjuvants, surfactants and active ingredients are not pesticide products. See this <a href="#">FAQ</a> for more information.
Multiple <a href="#">EPA Registration Numbers</a> on one line of the report.	Each <a href="#">EPA Registration Number</a> should be reported on a separate line.  Pesticide Application Reports: This is true even if the application is a mixture of pesticide products. Report all products that were included in the mixture along with the <u>pre-mix</u> amount of each product used on separate lines.
<a href="#">Special Local Need (SLN)</a> products are reported incorrectly.	If an <a href="#">SLN</a> is applied or sold, you should report the <a href="#">SLN number</a> , not the <a href="#">EPA Registration Number</a> .
Commonly mistaken EPA number: 432-1452 (Tempo Ultra GC Insecticide)	The number should be 432-1452, not 4321452, 432.1452, 0000432-01452, or 5966204.
Commonly mistaken EPA number: 62719-486-34704 (Signature Dimension 0.10 Plus Fertilizer)	Number should be 62719-486-34704, not 67219-468-34704, 11800-CA-001, 6271948634704.
