Where on the website do I find the files to send to the Service Bureau?

Information about our various PRL Reporting Software options and links to download software or electronic copies of PRL forms can be found on our download page. This page is also reachable from our home page by clicking the " Download one of our electronic reporting options" item.

Please remember that the PRL Reporting Software options are **not** "the files to send to the Pesticide Reporting Service Bureau." They are programs that will help you enter your report data on your computer and create the files you will need to submit.
