Decide Which Forms to Use

Decide Which Forms to Use

If you have multiple applicators to include on your report, we recommend using Form 26A to enter their information. The pesticide applications they made should be entered on Form 26. If any of the applicators that you are reporting for made any applications during the report year, you should submit a Form 26.

You may enter all your applications in one file even if they were made by multiple applicators; we do not need a separate report for each applicator.

If you are reporting for a pesticide sales business and you sell restricted-use pesticides, use Form 25. If you sell pesticides to private applicators, we will need a Form 27. If you have a commercial permit number, you must submit either Form 25, Form 27, or both.

Be sure to include applicators who did not make applications on your report and applicators who left your organization during the report year. If your organization is a pesticide sales business, you must file a report even if you did not make any sales during the report year.

You can report two different types of sales on Form 25; report either sales to another commercial permit holder who will resell the products or sales to commercial applicators for their end use. In Options A and B, there are a set of radio buttons in the Form 25 header where you can specify the sales type. Options D and O have drop-down lists for specifying the sales type. If you have both types of sales to report, please send us a separate form for each type. However, you do not need to complete a form for the type of sales you did not make (but you still need to report even if you did not make any sales).
