

Getting Started Guide - Option A

The information on this page only applies to version 6.1 of the Reporting Software Options and related documentation. See [this page](#) for other versions of the documentation. The version number of the PRL software you are using can be found on the Help menu under the About item.

- [Starting the Software](#)
- [Entering Contact and Identity Information](#)
- [Decide Which Forms to Use](#)
- [Opening up a Form](#)
- [Validating Files](#)
- [Entering Data](#)

Before you [download](#) one of our software packages, determine [which option is best suited to your needs](#).

Starting the Software

There are a couple of ways¹ to open up the main window:

- Double-click the "PRL Option A" shortcut on your computer's desktop.
- Click on the Windows **Start** button and navigate to **Programs -> Pesticide Reporting -> PRL Option A**. Windows 8 users will have a "PRL Option A" icon on their **Start Screen**.

When you start the program, the [Control Center](#) opens.

The screenshot shows the 'NYSDEC Pesticide Reporting - Option A Control Center' window. The interface has a light blue background and a menu bar with 'File', 'Tools', 'Validate', and 'Help'. The main area is divided into several sections:

- Current Folder for Report Files:** Displays 'C:\PRL2014'.
- Report Year 2014:** A section with a 'Change Year' button.
- Business:** A form with fields for 'Business Name' (NY Pesticide Sales Co.), 'Business/Agency Registration Number' (00001), and 'Commercial Sales Permit Number' (R00001).
- Primary Applicator:** A form with fields for 'Certification ID' (C1987654) and 'Name' (Jim James).
- Pesticide Reporting Contact Person:** A form with fields for 'Name' (Bill James), 'Phone Number' (607-123-1234), and 'Email Address' (billjames@pesticide.com).
- Report Forms:** A section with four radio buttons: 'eForm 26: Applicator/Technician Pesticide Usage' (selected), 'eForm 26A: List of Applicators and Technicians', 'eForm 27: Pesticide Sales to Private Applicators', and 'eForm 25: Restricted Pesticide Sales'. To the right of these are three buttons: 'Blank Form', 'Existing Form', and 'Validate File'. Below the radio buttons are two bullet points: 'If you provided a Business Registration Number or Applicator Certification ID, you **must** include at least one Form 26 (or a Form 26A that shows that no applicators made applications).' and 'If you provided a Commercial Sales Permit, you **must** include at least one sales report (Form 25 or Form 27).' At the bottom of this section is a checkbox: 'Optional: Submit separate Form 26 file for each Applicator. (Complete Form 26A first.)'.
- Buttons:** At the bottom of the window are four buttons: 'Show Instructions', 'Validate Folder', 'Upload Report', and 'Exit'.

Control Center

Entering Contact and Identity Information

Use the [Control Center](#) to tell us who to contact when we communicate with you about your report. Please fill out all three fields under **Pesticide Reporting Contact Person**. You also need to provide identification information, so that we can associate your report with the correct applicator(s) or organization.

Are you in the pesticide application or sales business?

Pesticide application businesses should submit

- a [certification ID](#),
- the **Applicator Name** associated with the [certification ID](#),
- optionally, a [business registration number](#), and
- optionally, the **Business Name**.

Pesticide applicators should submit

- a [certification ID](#), and
- the **Applicator Name** associated with the [certification ID](#).

Pesticide sales businesses should submit

- a [commercial permit number](#),
- the **Business Name**,
- optionally, a [certification ID](#), and
- optionally, the **Applicator Name** associated with the [certification ID](#).

Multiple Applicators or Sales Permits

If your organization employs [multiple applicators](#), just choose one of them to enter in this form.

If your business has more than one [business registration number](#), enter the one for the main business office. You may — but are not required to — submit the other [business registration numbers](#) using a [Form 26A](#). See this [FAQ](#) for more information.

If your business has more than one [commercial permit number](#), you may enter one number here and provide separate [Form 25s](#) or [Form 27s](#) for each [commercial permit number](#). The header areas of both forms have a [commercial permit number](#) field, which is editable. You may also send us separate reports for each [commercial permit number](#).

Decide Which Forms to Use

If you have [multiple applicators](#) to include on your report, we recommend using [Form 26A](#) to enter their information. The pesticide applications they made should be entered on [Form 26](#). If any of the applicators that you are reporting for made any applications during the report year, you should submit a [Form 26](#).

You may enter all your applications in one file even if they were made by multiple applicators; we do not need a separate report for each applicator.

If you are reporting for a pesticide sales business and you sell restricted-use pesticides, use [Form 25](#). If you sell pesticides to private applicators, we will need a [Form 27](#). If you have a [commercial permit number](#), you must submit either [Form 25](#), [Form 27](#), or both.

Be sure to include applicators who [did not make applications](#) on your report and applicators who left your organization during the report year. If your organization is a pesticide sales business, you must file a report even if you [did not make any sales](#) during the report year.

You can report two different types of sales on [Form 25](#); report either sales to another [commercial permit holder](#) who will resell the products or sales to [commercial applicators](#) for their end use. In Options A and B, there are a set of radio buttons in the [Form 25](#) header where you can specify the sales type. Options D and O have drop-down lists for specifying the sales type. If you have both types of sales to report, please send us a separate form for each type. However, you do not need to complete a form for the type of sales you did not make (but you still need to report even if you [did not make any sales](#)).

Opening up a Form

When you have decided which form(s) to use, click the corresponding radio button in the **Report Forms** area. Do you want to start a new file or add to an existing one? To start a new file, click on the **Blank Form** button. For an existing file, click the **Existing Form** button. This will open up a dialog in which you can choose the file you want.

Validating Files

Option A is also designed to validate ASCII text files that were created using other software applications. Only text files can be validated. Files are checked for compliance with the [PRL Text File Specifications](#). The specifications are also available on the **Help** menu under **File Format Guidelines**.

For step-by-step instructions on using Option A to validate your files, see [text file validation steps](#).

Entering Data

On all the forms the name and ID(s) appropriate to the form type will be pre-filled in the header area. In most cases these fields are not editable. On **Form 26A** the applicator you entered on the [Control Center](#) will be pre-filled on the first row of the form.

If you did not make applications (**Form 26**) or sell any pesticides (**Form 25** or **27**), check the box in the header area and save the form. **Form 26A** has a column where you can indicate whether the applicator made applications.

Form 26

To add a new row on any of the forms, just click in the first empty row and start typing. As you are entering data right-clicking the mouse will display a pop-up menu of options to insert, duplicate and delete rows and options to cut, copy and paste one or more cells.

See the [Data Dictionary](#) for field descriptions and the record layouts of each form.

The [EPA Registration Number List](#) makes it easy to enter the same product repeatedly.

Cells are [validated](#) as you move the insertion point to the next cell. While it is possible to save and submit your files without correcting validation errors, the [Pesticide Reporting Service Bureau](#) may reject or return reports because of the invalid data.

By default the file is saved in the [report folder](#). You can change the file location to wherever you want, but it will be simpler when you are ready to upload the files if you save them in the default location.

Closing a form will return you to the [Control Center](#) where you will be able to open another form, exit the application or [upload the report](#) to us.
