Can I send my report to NYS DEC from within the Option A, B, C, or D (installed version only) PRL Reporting Software?

Yes, with rare exceptions. In fact, uploading directly from version 6 of the Pesticide Reporting Software (Options A, B, C, or D (installed version)) is the quickest and easiest way to submit your report.

Click the **Upload Report To NYSDEC** button on the Control Center and follow a few simple steps. See **How to Submit Files to DEC** on the **Help** menu for more details.

The exceptions? Some users in a tightly controlled enterprise environment might not be able to use the direct upload method. If that is the case, then you may upload your report through the website.
